

GRP

Elementary School

POWER POINT PRESENTATION

The following presentation is designed for use in grades 2-5. The content can be adjusted for use in grades Pre-k – 1 as teachers deem appropriate.

General Response Protocol

Classroom Training

Grades 2-5

What does safety
mean to you?

Ways that we keep ourselves safe:

We wear seatbelts when we ride in
a car,

to protect ourselves in case of an
accident.

We cross the street in the crosswalk,

so that drivers know to look for
crossing pedestrians.

**In school, we do
many things to help
keep ourselves safe.**

Fire Drills

A fire drill is a way for us to practice using an exit in case of a fire **INSIDE** our school. A fire drill is one kind of an evacuation.

EVACUATE means to get out of the building immediately.

EVACUATE!

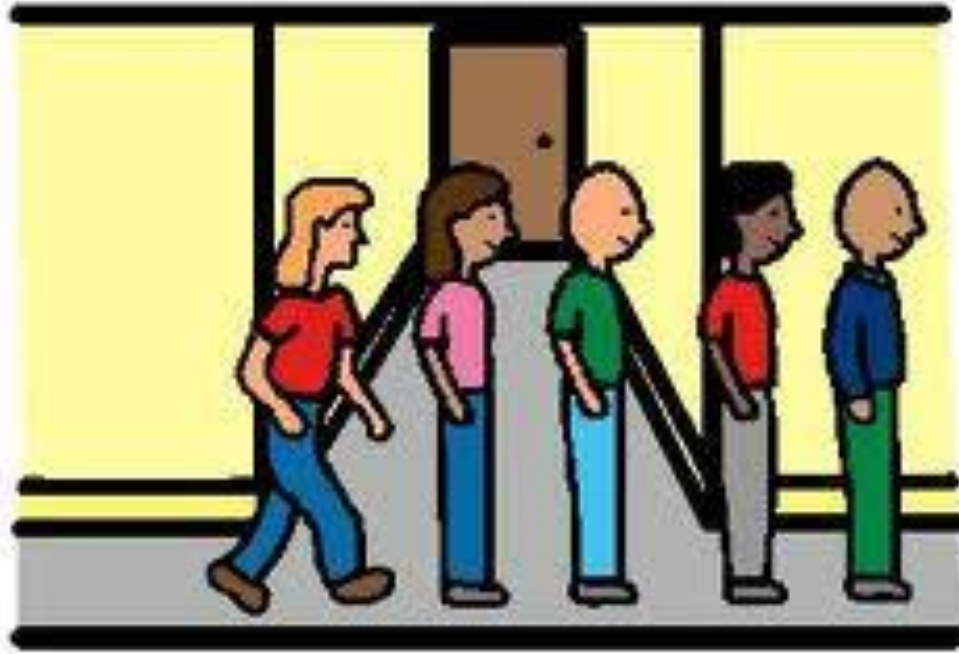

- If you have to evacuate the building you will hear the fire alarm sound. You may also see the strobe (flashing).
- You might hear an announcement over the PA system that gives every adult and student special directions
- Students will follow the direction of their teachers and proceed to their assigned location until they can return to the school.

During an Evacuation

Stop talking and listen for
directions from your
teacher or other adult.

Line-up and wait
quietly for directions.

Exit the building, go
to your assigned
location and wait
quietly for directions.

EVACUATE!

If you are in the hallway or a bathroom without an adult and the EVACUATE directive is given:

- Walk to the nearest classroom and tell the teacher that you are from another class.
- You will exit the building quietly with that class.

SHELTER-IN

SHELTER-IN! Is a DIRECTIVE that tells you that there is a problem OUTSIDE of the school, and we need to stay INDSIDE.

You will hear this announcement over the PA system:

“Attention. This is a SHELTER-IN. Secure the exit doors.”

Shelter-In

EXIT

The Principal and other adults will make sure that all **EXIT** doors are locked.

Teachers and students
will continue with their
regular school day.

During a Shelter-In

NO ONE will be allowed to
enter or exit the building until
the

Shelter-In Directive has ended.

The Shelter-In is over
when you hear this
announcement:
“The Shelter-In has
been lifted”.

Lockdown

LOCKDOWN

Lockdown! that tells you that there is a problem INSIDE the building and we need to go to a SAFE place. All adults in the school know where all the SAFE places are in the building.

LOCKDOWN

SAFE places in the building include:

- The corner of your locked classroom.
- Inside a locked bathroom.
- In a locked office.
